

ARCUS Supplier Information Management System

What Does It Do?

ARCUS Supplier Information Management (SIM) is a highly configurable, Cloud based system designed to support a variety of vendor and contractor processes with the aims of maximising the use of your established supplier* base and protecting your organisation from supplier induced risk.

* For convenience, the term 'supplier' is used to represent supplier, vendor, contractor, sub-contractor, consultant etc.

Typically ARCUS SIM is implemented to provide one or more of the following capabilities:

- Supplier Registration
- Supplier Pre-Qualification
- Supplier Approval / Accreditation
- Supplier Compliance Management
- Supplier Risk Management
- Supplier Profiling
- Supplier Discovery

 13.* Address:
Sales Contact Details
 14.* Sales Contact - Is this different from Main?: Yes No

To continue your registration process please complete the following page. You can log in and save the information as many times as you wish.

How does it work?

- Suppliers are invited to complete online questionnaires that are designed and built to your organisation's requirements.
- The supplier approval workflow is configured and automated to reflect your process steps.
- Ongoing maintenance and updating of supplier information is undertaken by the suppliers themselves.
- Suppliers are sent automated update reminders that are triggered by the system - e.g. insurance expiry.
- A comprehensive dashboard presents you with a bird's eye view of the status of your entire supplier base.

Custom Reports

Report Name: Employees By Postcode - Created by: Company Admin

Export suppliers to... Export

Select all suppliers

Drag a column header here to group by that column

	Company Name	Status	Approval Status	Category	Postcode	No of direct employees
<input type="checkbox"/>	3M 3M	Suppliers Complete	Approved	Maintenance and Repair		
<input type="checkbox"/>	Adecco Adecco	Suppliers Complete	New	Courier Services		
<input type="checkbox"/>	Avianca3 aLISTAIR	Suppliers Complete	Trading With	Courier Services	2099	2-5
<input type="checkbox"/>	Fizz Bang Electrical	In Progress	New	Maintenance and Repair		
<input type="checkbox"/>	Yalumba Yalumba	Suppliers Complete	Approved	Stationery/Office Supplies	2050	21-50

- A dynamic reporting system allows filtering, searching, sorting, grouping and exporting on any data held in the system.
- A full audit log of data changes is kept for each supplier.
- You manage your suppliers by exception.
- You own the data.

Rasp Pty Ltd

Rasp Pty Ltd is the provider, implementer and support service for the ARCUS suite of e-Sourcing and supplier management modules. Established in 2007, Rasp helps organisations reduce the costs, risks and complexities associated with managing a large supplier base. Its solutions support a range of supplier management activities: from initial tenders and supplier information management (SIM), through to supplier contract and performance management. The cloud-based ARCUS® platform features a suite of easily-configurable modules that are fast to deploy and simple to use. The ARCUS eSourcing modules also underpin the fully managed eAuction service.
